ARAB SCHOOL OF UROLOGY

Arab Association of Urology (AAU) is a non-profit organization established in 1996 with a mission to connect all Arab national societies to provide their members with a high standard of education, research and clinical practice in the field of urology.

Joint sessions and collaborations of AAU

The collaboration between AAU and SIU at the 44th Annual Congress of the Société Internationale d'Urologie (SIU), held in New Delhi, India, from October 23 to 26, 2024, underscored the significance of international cooperation in advancing urology. The session addressed various topics, including updates on diagnostics and prognostic evaluation of solid renal tumors, optimization of prostate biopsy techniques (micro-ultrasound versus MRI), new options in managing non-muscle invasive bladder cancer (NMIBC), and best practices for managing storage symptoms in male lower urinary tract symptoms.

This joint effort created a platform for knowledge exchange, fostering a deeper understanding of the challenges and opportunities in urology. Attendees benefited from the experiences and expertise of their peers, gaining valuable insights to apply in their own practices. The session highlighted the commitment of both AAU and SIU to promoting excellence in urology through collaboration and innovation.

AAU Session at the 58th Annual Congress of the Egyptian Urological Association, held from November 11-14, 2024, in Hurghada, Egypt

Session:
Middle East Experience in Robotic Surgery

This session highlighted significant advancements and shared valuable insights into the latest techniques and outcomes in the field.

The session covered three key topics:

- Robotic-Assisted Radical Cystectomy: Where We Are in 2024
- Retzius-Sparing Robotic Radical Prostatectomy: UAE Experience
- The Impact of 3D Models on Positive Surgical Margins After Robot-Assisted Radical Prostatectomy.

The AAU session at the congress provided a platform for sharing knowledge, fostering collaboration, and highlighting the Middle East's contributions to the field of robotic surgery.

Attendees left with a deeper understanding of the latest techniques and innovations, ready to implement these advancements in their own practices.

The 58th Annual Congress of
THE EGYPTIAN UROLOGICAL ASSOCIATION

The 21st Arab Association of Urology (AAU) Congress in Qatar

The 21st Annual Arab Association of Urology (AAU) Congress took place from November 21 to 24, 2024, at the Itqan Clinical Simulation and Innovation Center in Doha, Qatar. This prestigious event brought together leading urologists, researchers, and healthcare professionals from around the world to share and explore the latest innovations in urological care.

One of the key highlights of the event was the 33rd World Congress of Videourology and Advances in Clinical Urology, which ran concurrently with the AAU Congress. This segment focused on the latest surgical techniques and innovations in minimally invasive urological surgery, providing valuable insights and practical knowledge for practicing urologists.

The congress featured a series of engaging sessions, cutting-edge presentations, and collaborative discussions, highlighting groundbreaking research and advancements in the field of urology. Attendees had the opportunity to participate in workshops, accredited symposia, lectures, and master classes, all led by world-renowned experts.

The AAU Congress 2024 was not just a meeting but a collective effort to elevate patient care, expand understanding, and push the boundaries of what's possible in urological medicine. The dynamic discussions, networking opportunities, and spirit of innovation made it a landmark event for the global urology community.

The Live Transmission of Telesurgery on the MEDBOT captivated delegates at the Shanghai MicroPort Booth on the Exhibition Floor, marking the first-ever Telesurgery broadcast in the MENA region.

This revolutionary session connected Shanghai to Doha via the Itqan Clinical Simulation & Innovation Center at Hamad Medical Corporation, showcasing the potential of robotic surgery to transform Urology and remote healthcare.

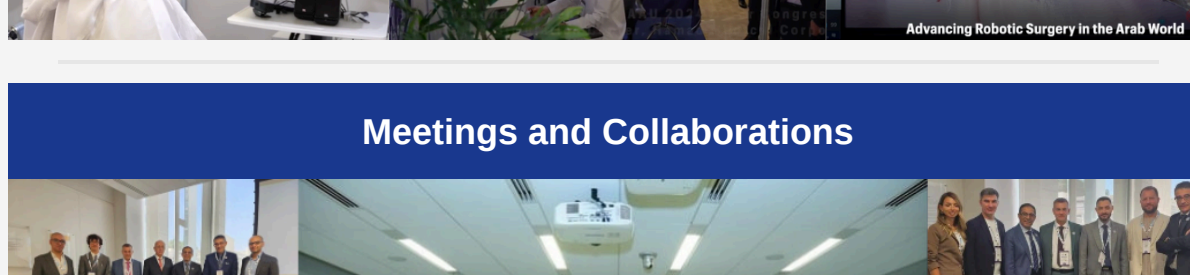

Telesurgery Live Transmission

Highlights included:

- ✓ Real-Time Surgical Demonstration: Displaying the MEDBOT's precision and cutting-edge capabilities.
- ✓ Global Connectivity: Breaking geographical barriers through seamless collaboration between Shanghai and Doha.
- ✓ A Look Ahead: Underscoring the future of Telesurgery and its impact on patient care and surgical training.

Advancing Robotic Surgery in the Arab World

Meetings and Collaborations

Strengthening Urology's Future: AAU Board's Collaborative Efforts in the Last Quarter

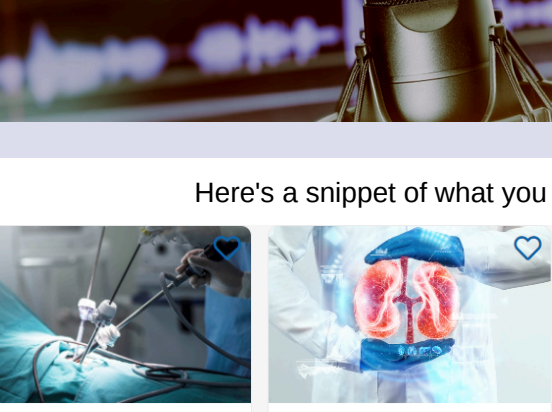

In the last quarter, the AAU Board has made significant strides in advancing the field of urology through a series of strategic meetings and collaborations. These efforts have been pivotal in addressing key challenges and fostering innovation within the discipline.

The board's initiatives have focused on enhancing research capabilities and promoting educational opportunities for urologists. By partnering with leading institutions and experts, the AAU has been able to leverage diverse perspectives and expertise to drive impactful changes.

Key highlights of these collaborative efforts include the launch of cutting-edge research projects and the organization of educational workshops and seminars. These initiatives are designed to equip urologists with the latest knowledge and skills, ensuring they are well-prepared to meet the evolving needs of the field.

The AAU Board remains committed to its mission of strengthening the future of urology. Through continued collaboration and innovation, they aim to make lasting contributions to the field.
